PROFILE SUMMARY

Full-stack developer specializing in scalable web applications using Python, Django, Angular, and PostgreSQL, with strong skills in problem-solving, performance optimization, and leading cross-functional teams.

TECHNICAL SKILLS

- Languages: Python, TypeScript
- Frontend: Angular, Ionic, Bootstrap, HTML, CSS
- Backend/Frameworks: Django
- Databases: PostgreSQL, MySQL, MS SQL
- Version Control: Git

WORK EXPERIENCE

SENIOR PYTHON DEVELOPER | CIGNES BUSINESS SOLUTIONS | PALAYAM

(January 2025 - Present)

- Spearheaded backend development using Python and collaborated on frontend design.
- Directed a development team, leveraging analytics to enhance processes and decision-making.
- Resolved critical software bugs and optimized performance for scalable applications.
- Designed and maintained PostgreSQL database architectures supporting enterprise-level solutions.
- Contributed to the complete software lifecycle, ensuring timely and successful product releases.

SOFTWARE DEVELOPER | TRAVIDUX TECHNOLOGIES | CHALAKKUDY

(June 2021 - July 2023)

- Optimized backend and frontend development processes, improving project efficiency.
- Led a cross-functional team to deliver analytics-driven process improvements.
- Built robust PostgreSQL database solutions, improving performance and data integrity.
- Reduced customer complaints by 20% through efficient resolution of complex technical issues.
- Increased team productivity by 30% via streamlined GitLab workflows and conflict reduction.
- Contributed to all phases of software releases, from planning to deployment, ensuring smooth rollouts.

TRAINEE SOFTWARE ENGINEER | QUEST INNOVATIVE SOLUTIONS | KADAVANTHARA

(October 2020 - April 2021)

- Gained proficiency in Python basics and MySQL database management.
- Crafted a clean and efficient codebase, adhering to best practices in Python Django and Angular development.
- Utilized GitHub for version control and collaboration during project development, increasing team productivity.

PROJECTS

Transposys – Logistics & Transportation Management System

- Developed and optimized backend logic, created RESTful APIs, and managed PostgreSQL database structures.
- Handled server deployments and release management, ensuring smooth production rollouts.
- Collaborated in project coordination, working closely with cross-functional teams to meet delivery timelines.
- Participated in client meetings to gather requirements, provide technical insights, and ensure alignment with business needs.
- Integrated real-time GPS and vehicle tracking features to improve operational visibility and logistics efficiency.

Hardware Service Management System

- Designed and implemented a system for monitoring and managing hardware service requests.
- Features included assigning technicians, tracking progress, and providing updates to customers.
- Increased service request handling efficiency, leading to higher customer satisfaction.

Point Of Sales (POS)

- Created POS software to automate functions such as invoice generation, stock maintenance, and accounting for transactions.
- Improved sales operations by streamlining transaction management and inventory handling.
- Improved accounting accuracy and reduced errors.

Enquiry Track

- Designed and developed the Enquiry Track mobile app to assist in managing clients and business activities on the go.
- Enabled smartphones to function as personal sales assistants.
- Increased sales inquiries and enhanced productivity by reducing response time to client inquiries.

EDUCATION

B.TECH IN COMPUTER SCIENCE AND ENGINEERING

APJ Abdul Kalam Technological University | Gurudeva Institute of Science And Technology |
2016-2020 | CGPA: 6.30

HIGHER SECONDARY (STATE BOARD OF KERALA)

St. Mary's Higher Secondary School | 2014-2016 | Percentage: 78%

CERTIFICATIONS

- **Python Golden Badge, Hackerrank, 2024**
- **SQL (Advanced) Certificate, Hackerrank, 2024**
- **Data Science Fundamentals with Python and SQL by IBM, Coursera, 2024**
